An Daingean Design Statement Phase II -
Character Area Mapping and Design Guidelines
Client Kerry County Council in Partnership
with the Heritage Council
Plan Preparation 2008
Adopted 2009

Sheridan Woods Architects + Urban Planners have prepared the second phase of the An Daingean Design Statement. The purpose of the second phase of the Design Statement was to describe in detail the landscape setting, urban structure and built fabric of the town, identify character areas and key urban design elements which contribute to the character of each area, and to provide detailed urban design guidelines for the development of existing and emerging character areas.

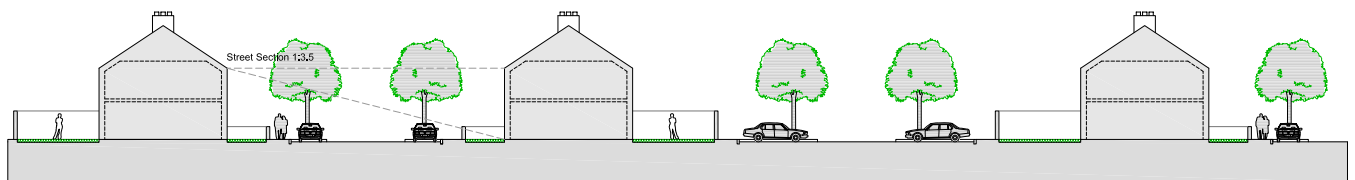

The preparation of the statement involved a community presentation and workshop which sought to identify strengths, weaknesses, opportunities and threats with respect to each of the character areas.

The outcome of the project is a detailed inventory of the built and natural heritage of An Daingean and a robust set of design guidelines which respond to the unique characteristics of each character area.
